More Vertically Tall for All

About Product

Vertical Carousel Modules are a series of carriers attached in fixed locations to a chain drive. Movement is powered by a motor, which sends the carriers in a vertical loop around a track in both forward and reverse directions.

Advantages of a Vertical Carousel

- Reduce storage footprint by going up and using the available space
- Reduce excess labor time and expenses by having the goods come to the operator
- Operator productivity can be increased by as much as two-thirds by eliminating the old "walk, search, stock, store" method of order picking
- Reduce the overall risk of injuries for employees by picking from an ergonomic height
- Increased organization for products and inventory

Industry 4.0 Features

☑ **ERP Integration :**
Machine can be interfaced with any ERP for Information Management. This comes as a basic feature for integration and can be upgraded with Artificial Intelligent tools along with our Production Planning and Control Software and Supply Chain Management Software, which are part of Creintors Information Flow Solutions (IFS).

Model No.	Weight per Carriers (kg)	No. of Carriers	Carrier Depth (mm)	Carrier Height (mm)	Width (mm)	Depth (mm)	Height (mm)
iVC 50	50	12-20	238-250	300-334	1000	1460-2450	2480-3780
iVC 50D	50	12-20	238-295	300-370	1460-2450	1000-1100	2750-4200
iVC 100	100	12-20	218-230	262-295	1460-2450	1000	2290-3440
iVC 100D	100	12-22	218-360	262-370	1460-2450	1000-1300	2780-4560
iVC 200	200	12-42	368-390	278-315	1960-3278	1600	2580-7154
iVC 500	500	14-32	500-530	375-415	1950-3350	1800	3710-7380

Unique Security with Reporting

Lockable front doors or position control doors opening provides the unique security feature to ensure 100% controlled access. Live Reports along with track of every transaction from any remote location, pick product by carrier number or part number and host interface capability for Advanced Inventory Management and Control strengthens to this security.

Optimum Space Utilization

Every carrier can include shelves and side extendable dividers to create discrete storage locations, thus optimum storage apart from utilizing the available vertical height and reducing the floor space requirement.

Complete Accountability

RFID / QR/ Barcode identification ensures complete accountability and of items users. Interface to weighing system enables to confirm required quantity of material accessed and stored.
