Holistic Approach

is our uniqueness

Vision

To be a preferred partner, providing innovative and sustainable technological solutions, to accomplish end to end customer requirements under one roof, with quality and on-time completion as our motto, built on a strong foundation of customer-supplier relationship and our social commitments to the society.

Our Belief is in Simplicity

Optimum Design

"The best design is always simple and a simple design the most optimum"
Our passion driven by trust of customer as a partner helped us establish this approach to deliver our innovations addressing their pains.

We are System Driven

Sustenance

Integrated Management Systems (IMS)certified company, re-inforcing our commitment to:

- Environment - EMS : ISO 14001
- Team's Safety - OHAS: ISO 45001
- Customer - QMS: ISO 9001
- Information Security - ISMS: ISO 27001

Our Approach is Unique

Co - Creation

Problem well defined is half solved, to do so our customers need to express it **"correct"** and our team needs to understand it **"correct"** This is not just said and done, there needs to be a tool or methodology. We follow **"Quick Fail"** concept to encourage our team to demonstrate their concepts to customers and help them confirm their requirements. This saves overall time to realise the solution, builds mutual trust and strengthens partnership with our customers.

Production Planning and Scheduling Software

Planning and Scheduling: A Must for every function...

Production Planning and Scheduling Software

Planning and Scheduling: A Must for every function...

Our PPSS is **Simple & Easy**

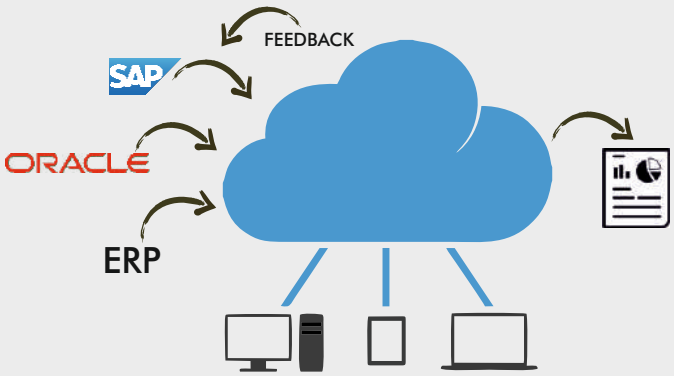

Our Production Planning & Scheduling Software is custom designed considering the user need at different levels. This makes our software more user friendly and unique solution for effective planning and scheduling.

Domain Features

- Auto scheduling based on Operation Sequences & Machine Groups
- Line Balancing with optimum capacity/ resource utilization
- Reschedule considering capacity constraints/ machine breakdowns
- Live Data visualization with alerts, Email notifications for total control

Strategic Features

- Ability to integrate with Third party Software (SAP/ Oracle ERP)
- Industry 4.0 connecting IOT devices for Machine Live Status
- Cloud Ready Development Platform

Outputs

Planning
- MRP
- Purchase Indents
- Resource Requirement

Scheduling
- Production Orders
- Issue of Raw Material
- Issue Tools and other resources

Monitoring
- Visibility Machine/ Component process live updations, buffer levels.

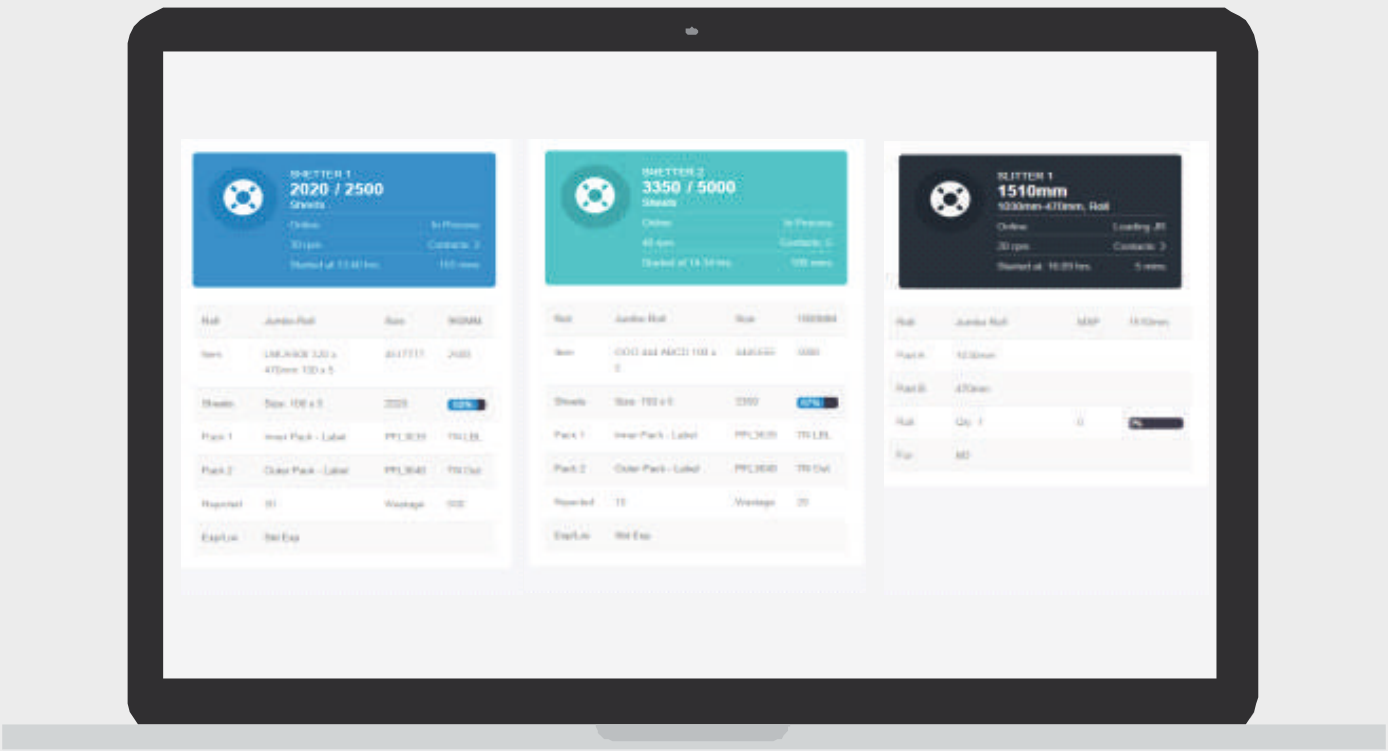

Inputs

Planning Master Data
Material, BoM, Capacities, Routing

Demand (Sales Orders, Forecast data, MTO, MTS etc.)

FG, RM Stock Levels, Tools & Fixtures running Operational data

FMCG/FMPG Order Processing and Delivery Management Software

Your Friend Indeed

Fast Moving Consumer Goods(FMCG) / Fast Moving Perishable Goods (FMPG)

FMCG/FMPG Order Processing and Delivery Management Software (Mitra Webapp)

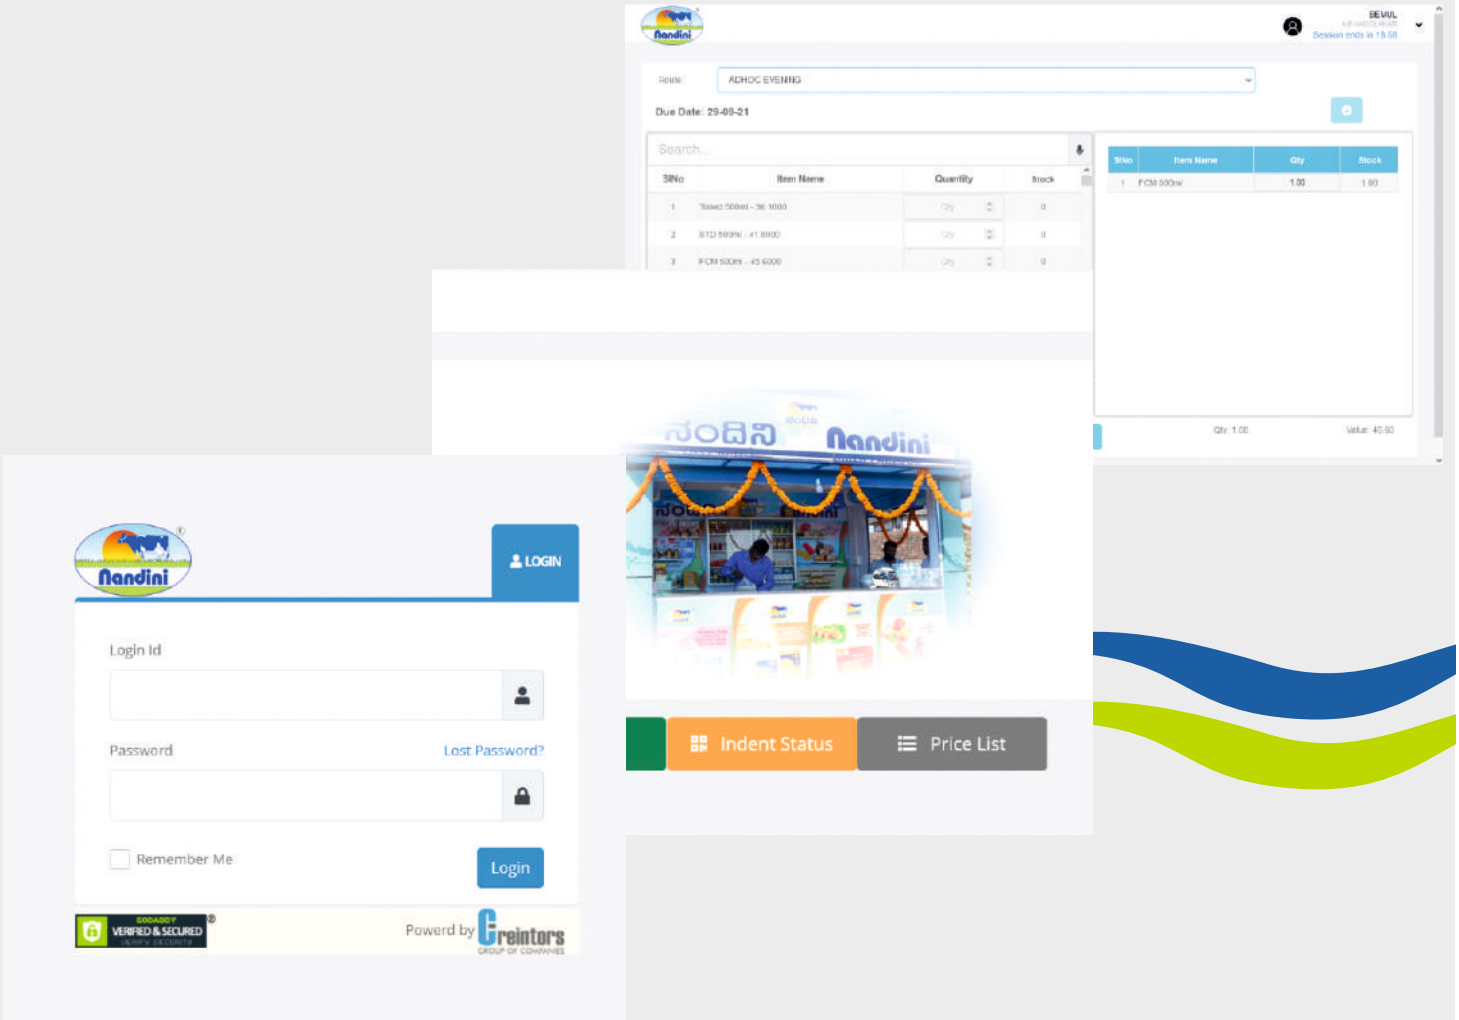

Your Friend Indeed

The CFS Mitra Webapp is a FMCG / FMPG order and delivery processing cloud based Service developed to tackle the cumbersome task of managing the constant inflow of orders from numerous customers/ distributors and order fulfillment.

The key highlights of this Web-app are

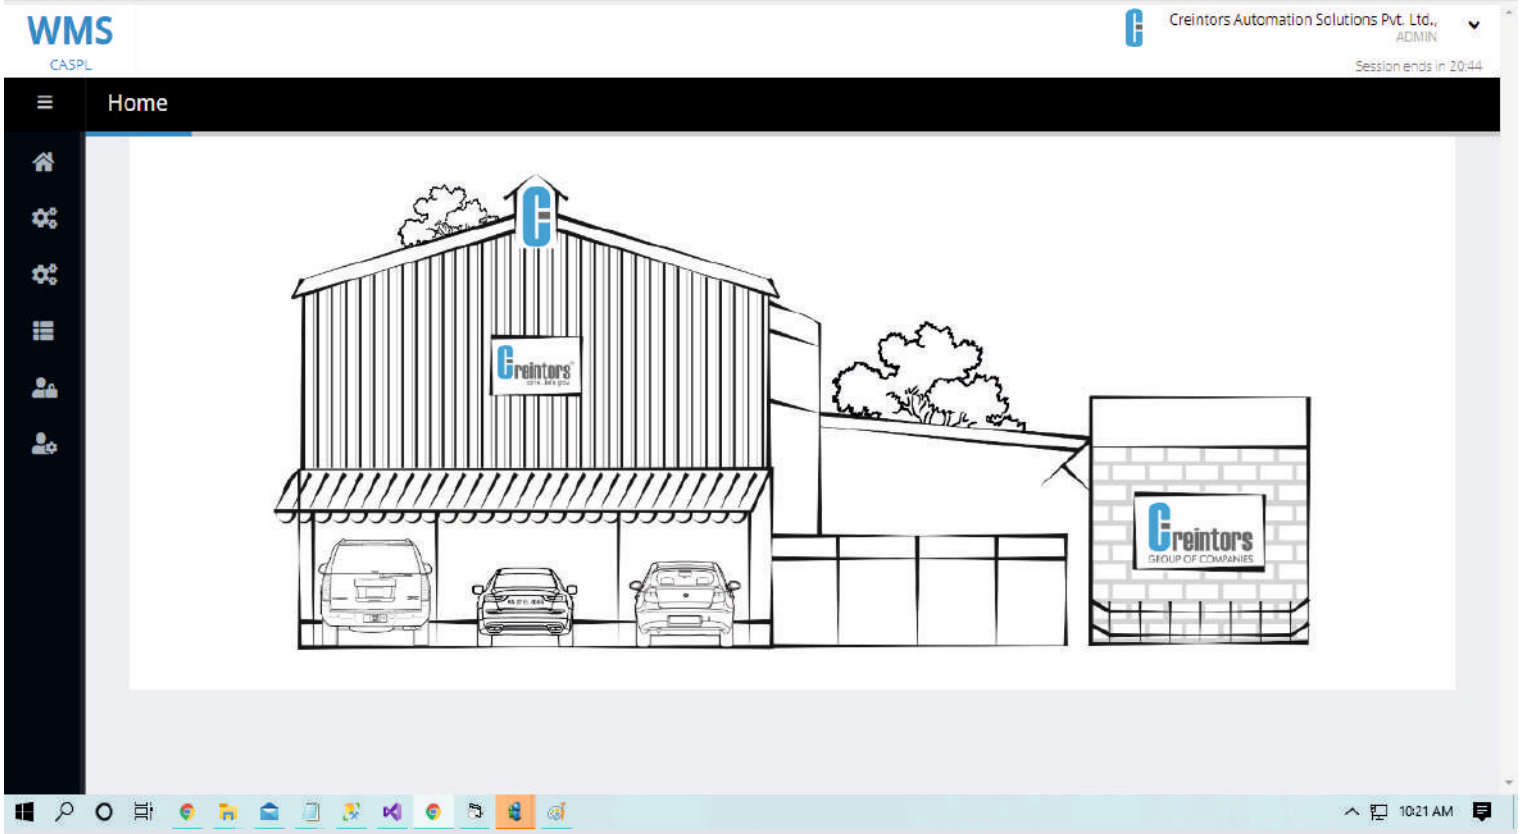

- Individual login allows the customer/ distributor to place orders instantly and independently.
- The live stock update and online pricing allows for smooth error free transactions.
- Bar coding and weigh scale integration helps achieve 100% accuracy in order fulfillment.
- CFS Mitra generates route sheets and vehicle loading charts thus, ensuring error free dispatches.
- The system generates E-Invoices and E-way bills and also allows for UPI and other payment method integration for smooth transactions.

All of these add value to both the product and the service...building a strong relationship of trust and transparency.

Tool Management System

The Right Edge

Tool Management System

The Right Edge

Our holistic approach helps us visualise and provide industry with complete **Information Flow Solutions**. We interface any machine with our software and hardware capabilities, making it simple for any operator to utilize the full potential of our solution example conventional machine and CNC machine with ERP, Tool Presetters etc to ensure visibility for enhancing productivity with no repeated work and first time right operation.

The TMS from Creintors Automation Solutions Pvt Ltd is a simple yet effective method of keeping track of tool life and insert consumption.
The system adds a layer of accountability to tool life management and also provides a detail history of every tool and insert that is used via the system.
It can keep track of critical parameters of a tool and also measure insert consumption based on Project/Operation/Machine.

Key Software Features

Ownership At All Levels

Each user gets a feel of the customised system for him/her and thus a comfort with ownership of the machines and tools.

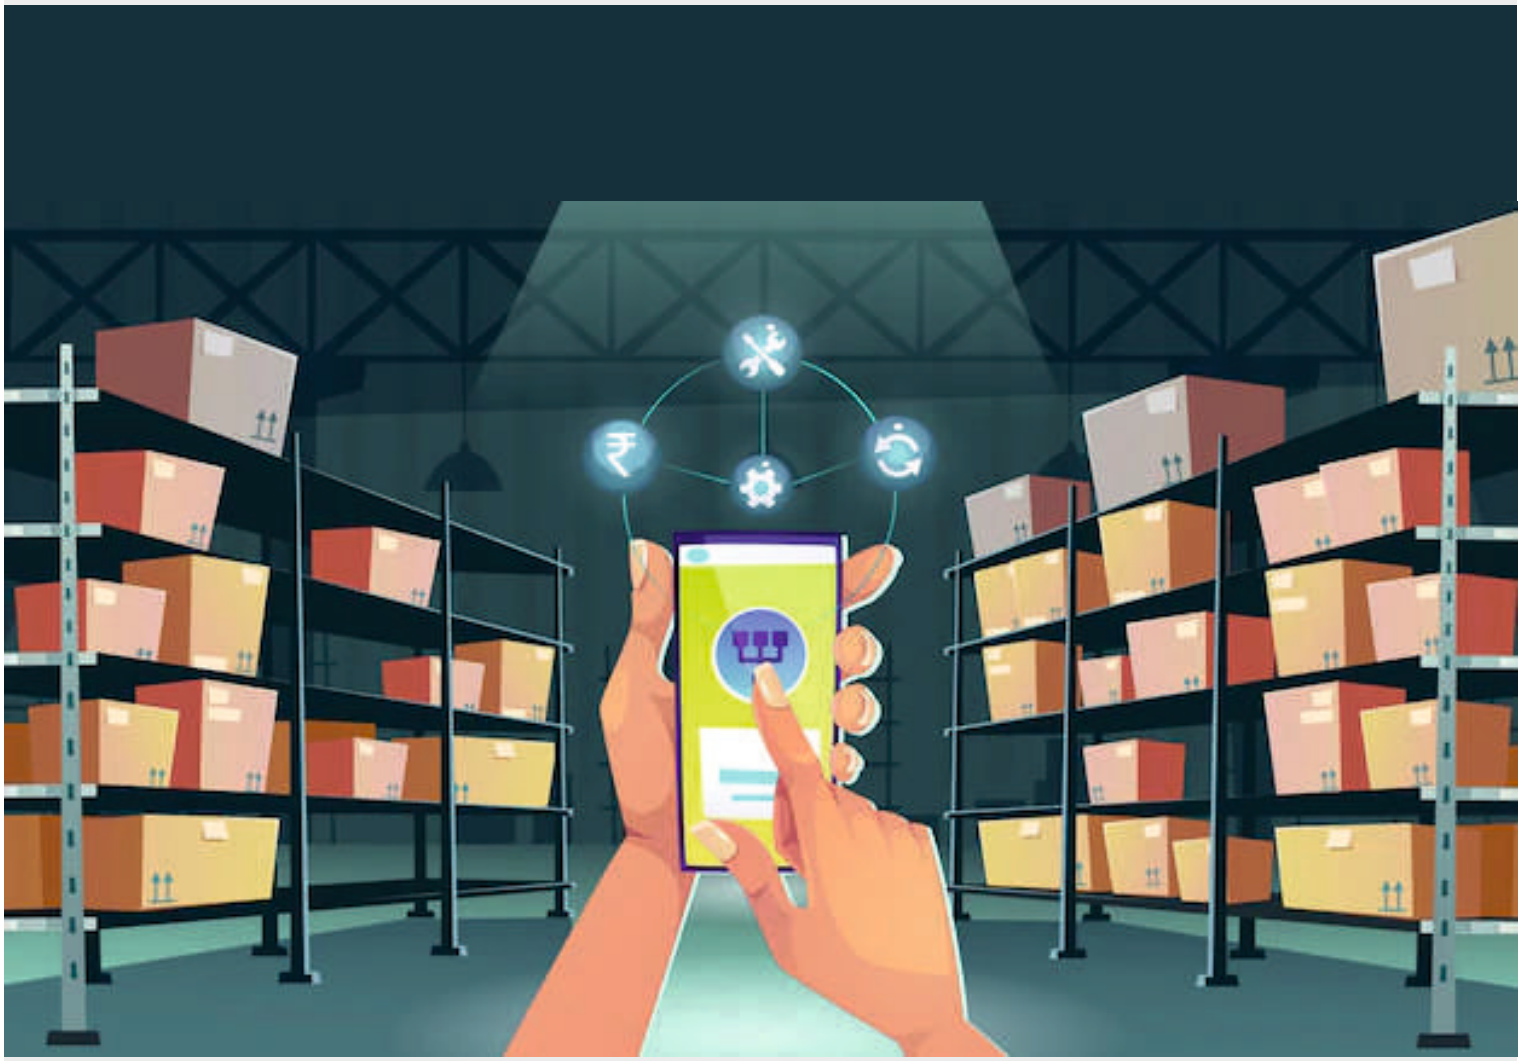

ERP Interfaced Reporting

Visibility of consumption in relation with machine, product, operator and plant with respect to time gives effective control to the system admin, thus ensuring accountability with 24x7 readiness of tools.

Ease to Operate - User Screens

Human Machine Interface simplicity provided by our software design, helps the users to adapt quickly and reap the best benefits of our solutions. Any User who operates a Cellular Phone/Mobile/TV Remote can operate this machine. Control access screens give navigation through different modules. Every User is provided with authorized control access to navigate through features to make him/her and the system more Intelligent and Productive
